<b>Group Members</b>	<b>Contributions</b>
Pooja Singhal (2017CA30)	Worked on both Front and Back end of the Project.
Suman Kumar (2017CA31)	Worked on both Front and Back end of the Project.
Anjali Arora (2017CA20)	Worked on both Front and Back end of the Project.
Tanu Dhamija (2017CA22)	Worked on both Front and Back end of the Project.
Shiwani Sharma (2017CA36)	Worked on both Front and Back end of the Project.

# **1.Introduction**

Placement Portal is a Portal for the Students of our College. It will allow them to make an account on our Portal and give them all the information about all the companies visiting to our campus . And also details regarding the registration to that company and deadlines for the same.

## **2.Software Requirements**

Visual Studio IDE

Xampp

### **3.Problem Discussion**

This Problem is designed specially for the students of MCA. Sometimes it is difficult to find whether that MCA students are eligible for that particular Company. And most importantly sometimes we miss the registration process information as half of the information is present on the portal and half of that comes on mail. And there is one more problem i.e, The Schedule of the upcoming Companies coming in our Campus .

### **4.Implementation (With Program)**

We have designed a software for the Placement and Internship Session held in our College.

We have used Bootstrap,HTML,CSS, JavaScript for the front end. And PHP for the server side language and MySql for Database.

First of all the user has to create an account on our Portal by filling all the necessary details and on subsequent accesses he/she just has to login. And after that the user can see the companies visiting our Campus within a week and their eligibility criteria as well as their registration process.

And also user can also register for the company the Portal.

## Readme

The Objective of this Portal is to provide all the necessary information about the placement and internship session going on in College. This Portal is for students of the College and by the students of College. For now we have designed it for students of MCA only.

Some Features of the portal are:

1. User/Registration Login
2. Schedule of Companies Coming
3. Interview Experiences of Students Selected in Companies.
4. Registration Link to the Company Form.
5. Details of the Placement Cell of our College.

Technologies Used:

1. HTML
2. CSS
3. JavaScript
4. PHP
5. Mysql
